

The drawing illustrates two alternative safety zone layouts for a road intersection. The left layout shows a safety zone with a width of 316 and a length of 842. It includes a central area with a width of 200 and a length of 700. The safety zone is defined by a dashed line with a radius of R600 and a solid line with a radius of R900. The right layout shows a similar safety zone with a width of 316 and a length of 842. It includes a central area with a width of 200 and a length of 700. The safety zone is defined by a dashed line with a radius of R600 and a solid line with a radius of R900. The drawing also includes labels for the safety zones (strefy bezpieczeństwa) and the safety lines (linia strefy bezpieczeństwa).
